COUNCIL AND MAYOR MIX ON APPOINTMENTS

(Continued from Page 1)

"It certainly is," the mayor shot

Kelly's Little Petition

"Then I have a little resolution to offer the public at the special election called to vote on armory bonds," replied Mr. Kelly. "It may save you a lot of trouble and will make it clear sailing. If you want to cut out horse play and scrapping over officials, and if you wish to really take the public in your confidence you will not oppose this petition."

The petition, which was laid over until later in the evening and finally adopted by the unanimous vote of the council, is coupled with the bond issue ordinance and changes the date of that election to Mar. 6. It provides, in brief, that the mayor may appoint one city attorney, one city engineer, chief of police, street commissioner, market master, and other employees as are required subject to the approval of the majority of the council. At any meeting the council, by a majority vote, may remove any official except the mayor. The mayor's power to suspend is limited to to one time for any one officer unless written charges are made and submitted to the council.

Mayor Asks Explanation

The council's refusal to confirm Mayor Effert's appointment of Harry Stockman as city engineer brought out the real intense feeling of the session. In turn as each voted against the confirmation, his bonor asked explanations from Councilmen Campbell, Millar, Stewart and Summerville. Mitchell and Porter voted for the appointment, after explaning that personally they favored Aruspiger but did not wish to oppose the mayor.

Councilman Campbell replied "Whether I have any objection to Mr. Stockman has nothing to do with the matter. I believe the city loses money if you remove a good engineer even if you appoint one just as good, as it takes time to become familiar with the work. I have no objection to Steekman. The trouble is you think that the council is bound to confirm make it a one man government if we are not to be allowed to exercise our judgments."

The other councilmen who were sked to explain, stated they did not believe it would be good business policy to remove a good engineer for personal, political or other reasons. and Summerville, in turn, demanded changed." to know why the mayor wished to appoint Stockman.

man." was the answer.

The Market Reports

The finance committee, Mitchell. found many had signed because they and Damon.

Some names represented people withalso stated that they found many and others opposed it.

Quite a contrary report came from until the next meeting. the committee which was asked to investigate the market for the past year. It exhaustively covered the year's work and concluded that the market had been run successfully and well, and that it would be a piece

had found out whether Mr. Runyard the Natatorium. Keep this in mind tions existing here, had ever taken the eath of office, a for, although she is not advertised a technicality which seems to be the on the Schuberts programs or printonly one left for investigation.

Summerville Appoints Committee

That the market master of the future, whoever he may be, will have a council committee to work with. Councilman Summerville made the motion that a committee of three. Millar as chairman, Campbell and Porter be named as market committee. When the mayor refused to put the motion Mr. Summerville put it himself, as president of the council, four to two vote.

After this motion was put Mayor

Because of the many requests which have come to this office, this calendar has been prepared. It has been compiled from the best sources, taking into consideration the soil and climatic conditions of the Rogue River valley. The time of planting does not take into consideration the growing of plants in hotbeds or cold frames, but rather, the dates when it will be safe every appointment. If that is true to put the seeds or plants in the open ground. Of course, it is understood that cabbage, tomatoes, sweet potatoes, etc., are to be grown in hotbeds or cold frames later to be transplanted. why do we have the confirming In the case of many varieties, a larger quantity of seed is advised than is really necessary; but this is on the safe side. If plants come up too thick, they may be thinned out. If there is any power? Hetter take it away and doubt as to the quality of the seed, germination tests should be made.

For early potatoes, planting should be at the earliest date possible; for late potatoes, the latter part of May. For such plants as mature in a short time, several crops may be grown during the season. It is to be understood that irrigation is absolutely necessary to secure profitable crops.

Send for Farmers' Bulletins Nos. 255 and 256, U. S. Department of Agriculture, Washington, D. C. They are free. These are bulletins on "The Home Vegetable Garden" and "Preparation of Vegetables for the Table." Also, send for the catalogues of the various seed companies.
